Vacancy: DESIGN DRAUGHTSMAN

The Company

We, Howard Eaton Lighting Ltd., are a long established designers and manufacturers of scenery and effects equipment for the entertainment industry. We mostly work for West end shows, operas and touring shows in the UK but also supply productions around the world. We have a small range of standard products which has grown out of special projects

The job

This is a full time position starting as soon as possible

You will be producing drawings to support all of the company's activities and these will include;

- Fabrication and scenery drawings
- Sheet metalwork drawings
- Engineering drawings
- General illustrations for manuals
- Schematic drawings of systems and electrical control layouts

You will have;

- An outstanding understanding of drawing
- A good understanding and experience of a broad range of practical manufacturing techniques
- Good practical and technical skills and a flair for making things
- An aptitude for maths, science and computer systems
- AutoCAD and ideally AutoCAD Inventor experience
- The ability to manage a varied workload and deal with sometimes seemingly impossible deadlines occasionally involving long hours and weekend working
- The ability to work well as part of a team
- Initiative and be able to take responsibility
- The ability to interpret concepts and sketches and help turn them into something that works.

Send your CV outlining your experience of manufacturing and CAD along with your salary expectations to us.
